

• PoliroofSA MB Ridge Band

Poliroof SA MB Ridge Band

Poliroof SA MB, providing permanent, practical and economical solutions in details such as roof ridge, gable wall, back wall, chimney flashing and eaves plate covering, is covered by coloured shingle granules and has polyester mat and self-adhesive bitumen layer.

ADVANTAGES

Easily applicable

PLACES OF USE

- roof ridge
- gable wall
- back wall
- chimney flashing and eaves plate covering

While the tape with a width of 33 cm is generally used in roof ridges, the tape with a width of 50 cm has been designed for use in details such as flashings.

APPLICATION

Poliroof SA MB can be implemented so readily by removing the release film on the underside.

PACKAGING

The width of the product can be 33 cm and 50 cm. The product length is 10 meters. It is offered to the market as a roll.

STORAGE CONDITION AND SHELF LIFE

Protect from direct sunlight, store upright.

Shelf-life is one year from the production date in case it is stored in its sealed and undamaged package in dry ambient conditions at a temperature from +5°C to +25°C away from direct sunlight.
